SUMMARY

Senior Developer with 8+ years delivering production-grade mobile and web applications. Specialized in the React ecosystem — from cross-platform mobile with React Native and Expo to performant web with Next.js — with a sharp focus on architecture, scalability, and developer experience. Experience spans fintech wallets, banking apps, airline booking systems, and AI-powered systems (RAG with Mistral AI and ChromaDB).

EXPERIENCE

Valtech

2025 – PRES

IT Services

Senior React & React Native Developer

Leading frontend development across multiple simultaneous client projects — including a React Native post-booking self-service app for Aerolíneas Argentinas, two Flutter apps for Berel (Mexican paint brand), a React Native superapp for Siman (Central American retail), and a React Native e-commerce app with a Fastify BFF for Unisuper/La Torre (Guatemala).
Driving technical health initiatives: incremental dead code cleanup, Redux modernization, and improved test coverage using react-doctor and Knip to measure and reduce unused exports.
Establishing architecture standards across teams: feature-based architecture, BFF patterns, XState for complex flows, and TanStack Query for server state management.

React Native	Flutter	TypeScript	Expo	Redux	XState	TanStack Query	Fastify	Jest
--------------	---------	------------	------	-------	--------	----------------	---------	------

Alten

2024 – 2025

IT Consulting · Freelance

Senior Fullstack Developer

Built a RAG-powered support assistant for NAVANTIA (SAP ARIBA) using Python/FastAPI, Mistral AI, ChromaDB and React — with real-time streaming chat, an intelligent email agent with auto-response, and an interactive semantic knowledge map built with UMAP + DBSCAN.
Developed a contract management platform for Airbus Defence and Space using Vue 3, GraphQL (Mercurius/Apollo), Node.js/Fastify and PostgreSQL — covering Liquidated Damages calculations, price escalation formulas indexed to economic indicators, and automated document generation (Word/Excel/PDF).
Built a project planning SPA for a German engineering client with an interactive Gantt chart, milestone tracking, KPI dashboards with Excel exports, and a granular 4-role permission system.

Distillery

2023 – 2025

IT Services

Senior React & React Native Developer

Developed Rabbit's mobile app with React Native + TypeScript, delivering a seamless shopping, payment and recharge experience.

Contributed to the backoffice platform using Next.js, improving administrative capabilities and operational efficiency.

Applied Feature-Based architecture and MVVM patterns across all projects for long-term maintainability.

React Native TypeScript Next.js MVVM Agile

n1u

2023 – 2024

Fintech · Freelance

Senior React & React Native Developer

Led development of the N1u fintech wallet app using React Native + Expo, crafting a dynamic and accessible cross-platform UI.

Designed and built the Backend-for-Frontend (BFF) layer with NestJS, acting as the intermediary between mobile frontend and backend services.

Implemented CI/CD pipelines, React Query for data fetching, and Jest for unit testing — ensuring reliability at scale.

React Native Expo NestJS BFF React Query Jest Zustand CI/CD

Valtech

2022 – 2023

IT Services

Senior React & React Native Developer

Led the frontend web team for Aerolíneas Argentinas, delivering high-quality flight booking and management solutions.

Developed and maintained AR-PLUS, the airline's loyalty and rewards program — a critical feature used by millions of passengers.

Drove adoption of Clean Architecture and component-driven patterns across the engineering team.

React.js Flutter TypeScript Redux Jest Clean Architecture CI/CD

Plannifai

2021 – 2022

SaaS · Shift Software

Frontend Developer

Built and maintained the web administration module with Vue.js for employee shift scheduling across multiple industries.

Contributed to the React Native mobile app, giving users on-the-go access to shift management features.

Vue.js React Native TypeScript Redux Jest CI/CD

Banco del Sol

2021 – 2021

Banking

Software Development Engineer

Developed the bank's Virtual Branch mobile application using React Native, ensuring high-quality features and a seamless customer experience.

Collaborated closely with designers to produce an accessible, pixel-perfect UI aligned with banking UX standards.

React Native TypeScript Jest CI/CD

Etermax

2018 – 2021

Video Games

Software Development Engineer

Developed and maintained frontend and backend components for internal tooling, streamlining processes across the engineering org.

First professional role — built a strong foundation in full-stack development, testing practices, and production systems.
